GROWMAX WATER™
Perfect Water for Plants and Gardens

WATER SYSTEMS FOR HYDROPONICS AND GARDENING

10 REASONS TO LOWER THE EC AND ELIMINATE CHLORINE FROM YOUR WATER

1- MORE NUTRIENTS FOR YOUR PLANTS

Starting with a low EC in your water allows you to add many more nutrients to your plants.

2- HEALTHIER ROOTS

Healthy roots are able to absorb 100% of added nutrients.

3- PROTECT YOUR SOIL

Water without chlorine, other chemicals and salts, will maintain a healthy microbial environment and protect your plants delicate uptake roots.

4- MAINTAIN A BALANCED pH

Reverse osmosis water will create a more balanced pH of approximately 6.5.

5- AVOID NUTRIENT LOCK OUT

High amounts mineral salts in your tap water can BLOCK or saturate plant roots, preventing them from absorbing key nutrients.

6- PROTECT OTHER MICROORGANISMS

Chlorine will kill beneficial bacteria and microorganisms that need to live so they can contribute to your soil health.

7- AVOID GROWING PROBLEMS

Using quality water will help avoid issues like yellowing leaves, burned tips, and growth problems in general.

8- ACHIEVE BETTER RESULTS FROM YOUR NUTRIENTS

Starting with PURE WATER will guarantee 100% effectiveness from your added nutrients and fertilizers.

9- PURE WATER IS THE FOUNDATION FOR GROWTH

Just like a strong house needs a solid foundation, QUALITY WATER is a must for extraordinary growth.

10- QUALITY WATER FOR YOU AND FOR YOUR PLANTS

Just as you like to drink good quality water, your plants deserve the same!
