

GROWMAX WATER™
Perfect Water for Plants and Gardens

WATER SYSTEMS FOR HYDROPONICS AND GARDENING

Green Coconut Carbon Block Filters

GrowMax Water is proud to confirm that ALL of our Reverse Osmosis and Filtration/De-chlorination Systems include Green Coconut Carbon Block Filters. These Earth Friendly Filters utilize high performance coconut shell carbon that is manufactured using a patented process that significantly reduces harmful green house gas emissions.

Green Coconut Carbon Block Filters are made using high performance coconut shell **green carbon** having more micro-pores compared to other types of carbon and a unique binder system delivering a product with superior absorption capacity and kinetic dynamics.

GrowMax now provides a filter that is not only better performing than anything on the market, but also...

Good for the Earth!

**Grow it to the MAX
with GrowMax Water!**
